networks an international journal

Volume Contents

networks an international journal
January 1991 volume 21, number 1

Minimal Diameter Double-Loop Networks: Dense Optimal Families
J.-C. Bermond and D. Tzvieli 1

Centroids to Centers in Trees
K. B. Reid 11

Efficient Algorithms for Inferring Evolutionary Trees
D. Gusfield 19

Shortest Path Algorithms Using Dynamic Breadth-First Search
D. Goldfarb, J. Hao, and S.-R. Kai 29

On the Multiway Cut Polyhedron
S. Chopra and M. R. Rao 51

Consistency and Satisfiability of Waveform Timing Specifications
J. A. Brzozowski, T. Gahlinger, and F. Mavaddat 91

A Network Equilibrium Formulation of Market Disequilibrium and Variational Inequalities
Z. Nagurney and L. Zhao 109

networks an international journal
March 1991 volume 21, number 2

Unbalanced, Capacitated *p*-Median Problems on a Chain Graph with a Continuum of Link Demands
H. D. Sherali and T. P. Rizzo 133

Maximum Matchings in Bipartite Graphs via Strong Spanning Trees
M. L. Balinski and J. Gonzalez 165

On the Existence of Uniformly Optimally Reliable Networks
F. T. Boesch, X. Li, and C. Suffel 181

Polynomial Time Algorithms on Circular-Arc Overlap Graphs
T. Kashiwabara, S. Masuda, K. Nakajima, and T. Fujisawa 195

Faster Parametric Shortest Path Minimum-Balance Algorithms
N. E. Young, R. E. Tarjant, and J. B. Orlin 205

Parametric Analysis of Optimal Facility Locations
M. L. Brandeau and S. S. Chiu 223

Conditional Graph Connectivity Relative to Hereditary Properties
O. R. Oellermann 245

networks an international journal
May 1991 volume 21, number 3

Euclidean Shortest Path in the Presence of Obstacles
Y.-M. Chen and P. Ramanan 257

The Generalized Folding-Cube Network
S. B. Choi and A. K. Somani 267

Minimum Weight Paths in Time-Dependent Networks
A. Orda and R. Rom 295

Resilience of Partial *k*-tree Networks with Edge and Node Failures
E. Mata-Montero 321

Reliability Covering Problems
M. O. Ball, J. S. Provan, and D. R. Shier 345

On the Nonexistence of Uniformly Optimal Graphs for Pair-Connected Reliability
A. T. Amin, K. T. Siegrist, and P. J. Slater 359

Book Reviews 369

networks an international journal
July 1991 volume 21, number 4

Fault-Tolerant Extensions of Star Networks
R. J. Dawson and A. A. Farrag 373

Minimal Diameter Double-Loop Networks. I. Large Infinite Optimal Families
D. Tzvieli 387

Uniformly-Most Reliable Networks Do Not Always Exist
W. Myrvold, K. H. Cheung, L. B. Page, and J. E. Perry 417

A Compilation of Relations between Graph Invariants—Supplement I
R. C. Brigham and R. D. Dutton 421

Maximum Independent Number for Series-Parallel Networks
L.-H. Hsu and S.-Y. Wang 457

Computational Development of a Lagrangian Dual Approach for Quadratic Networks
J. A. Ventura 469

networks an international journal
August 1991 volume 21, number 5

Average Properties of Two-Dimensional Partial Orders
J. B. Sidney, S. J. Sidney, and A. Warburton 487

Efficient Algorithms for Generalized Cut-Trees
D. Gusfield and D. Naor 505

On Dependence and Reliability Computations
T. Egeland and A. B. Huseby 521

A Two-Commodity Sharing Problem on Networks
T. Ichimori and N. Katoh 547

Solution Properties of Oligopolistic Network Equilibria
Y. Qui 565

Computing Rooted Communication Reliability in an Almost Acyclic Digraph
J. N. Hagstrom 581

networks an international journal
October 1991 volume 21, number 6

The Cut Cone, L^1 Embeddability, Complexity, and Multicommodity Flows
D. Avis and M. Deza 595

Solving Multistage Stochastic Networks: An Application of Scenario Aggregation
J. M. Mulvey and H. Vladimirou 619

Maximum Flows in Probabilistic Networks
H. Nagamochi and T. Ibaraki 645

Balanced Spanning Forests and Trees
A. I. Ali and C.-H. Huang 667

Approximate Solutions of Capacitated Fixed-Charge Minimum Cost Network Flow Problems
D. B. Khang and O. Fujiwara 689

networks an international journal
December 1991 volume 21, number 7

A Primal-Dual Algorithm for the Minimum Average Weighted Length Circuit Problem
C. Yang and D. Jin 705

Sensitivity Analysis of 0–1 Multiterminal Network Flows
S. C. Lin and E. Ma 713

A Multiphase Approach to the Period Routing Problem
R. A. Russell and D. Gribbin 747

Minimum Flows in (s, t) Planar Networks
V. Adlakha, B. Gladysz, and J. Kamburowski 767

Characterizing Stochastic Flow Networks Using the Monte Carlo Method
C. Alexopoulos and G. S. Fishman 775
